It's not that other fluids are so bad, It's just that ours are so good.

The people at Lubegard have been perfecting automatic transmission fluids 30 years longer than other brands. Lubegard was one of the first lubricant manufacturers to develop additive technology for a variety of fluid specifications. We didn't just nail it. We killed it. When different OEMs tested our product on their equipment, Lubegard reduced heat and acid and eliminated noise and vibration. It wasn't long before endorsements started pouring in from multiple OEMs around the world.

Lubegard products have been awarded ten times more industry choice awards by professional technicians and is, still to date, the only product of its kind that has ever been recommended for use by an original equipment manufacturer and the exclusive recommendation by the 3 largest repair chains. Another reason Transtar Industries recommends Lubegard.

We are the transmission fluid experts.
